Material of the month -Basic Human Needs and Tendencies

The children learn about the spiritual and material needs of all humans, including love, food, shelter, clothing, and transportation. According to Maria Montessori, needs fall into two categories – spiritual (to do with the psychic, soul and self, the ego and the intellect) and material (survival needs). She considered the spiritual needs to be the most vibrant, they drive humans forward, materials needs support this. This lesson will help our children to become peaceful, knowledgeable, respectful citizens.
